

*A Star Building System is compatible with any conventional exterior...*

## STAR METAL BUILDINGS LICENSED DEALER/BUILDER

Sensibility, with uncommonly beautiful design. Space, maintenance, durability, expandability and cost are major concerns when planning any addition, renovation or new building project.

Making these concerns minor is what Star Building Systems has been doing for almost 90 years, by providing attractive, functional, expandable facilities.

Each Star building is individually designed and engineered to meet your exact requirements as well as local building codes. Column-free interiors can provide uninterrupted floor space. No stacking and no driving around columns. All the open space you need as high as you need it. These systems enable a more profitable, smoother material handling process to be implemented.

Future maintenance and energy cost considerations are a major concern and they receive major attention. Performance-proven quality materials used in manufacturing insure savings on future upkeep and maintenance. A Star building offers optimal efficiency and is termite and fire resistant. When it's time to expand, Star can provide the answers. Star Building Systems provide the flexibility to add on in an easy and attractive way.

So, when it comes to designing and building your new facility, or expanding your current facility, consider Star Building Systems. Through our Design-Build Services, L.D. Docsa can provide a single source of responsibility and consult with you about site selection, topographic conditions and interior and exterior design to meet your long term objectives.

Call L.D. Docsa, your licensed Star Metal Building Systems dealer and builder at 269.349.7675, or visit the Star Buildings website, [www.starbuildings.com](http://www.starbuildings.com), to learn more about Star Building Systems.

*...and provides energy efficiency and lower maintenance costs.*

*Each Star Metal Building is designed and customized to fit our clients needs!*
